I feel as usual but this P.M. during one coughing spell I spit up quite a quantity of blood. I got some medicine which stopped it.

Mon. April 11

Had general review this P.M. I wrote a letter home. Bled some at the lungs.

Tues. April 12

I am now at the hospital in Loudon. It was formerly a hotel. It is a good place. Last evening I had a very severe spell of bleeding of the lungs. Got it stopped by taking whiskey. Had to take some about every hour, through the night, to prevent more bleeding. Dr. was somewhat alarmed therefore sent me to the hospital as soon as possible. The nurses here are very attentive, much more so than at the hospital in the rear.
